

3E/D	Monday 25 th January 2021 WALT: <i>predict what might happen, with some prompting.</i>	Predict 
Success Criteria		Myself
I can take part in discussions about a book		✓
I can understand that a prediction is a sensible guess		✓
I can use evidence to support my prediction point		✓
I can begin to further explain why I predict what I do		✓

Picture on worksheet!

What can you see in the picture?

I can see - lava from the huge explosion out of Mount Vesuvius. I can also see the lava pouring down the sides of the mountain. I can see a boat travelling on the big, choppy waves. It looks like all the houses are about to be destroyed. I think houses are the city of Pompeii. I can see lots of smoke and clouds and this is all the ash and rocks from the exploding volcano. There is also lightening in the clouds of smoke.

What do you predict will happen to the nearby city of Pompeii?

I think the nearby city of Pompeii will get destroyed. I think this because hot ash is surrounding the city of Pompeii. I know this because I can see hot, steaming lava bursting out of the volcano with rocks and hot ash and once everything goes up it has to come down. Pompeii is in the path of all of this.

Extension:

Write a paragraph of the story to describe what happens next to Mount Vesuvius and the city of Pompeii.

The lava came down and was approaching the houses. Ash hovered over the city of Pompeii rocks and fire balls came down and hit some houses. People of Pompeii grabbed belongings and evacuated as soon as possible. Everyone from Pompeii got on to boats with belongings. Lots of houses got destroyed by hot steaming lava. Boats started to evacuate from the city of Pompeii. The waves were choppy like a crocodile.
